C-USB3/AB

USB−A to USB−B 3.0 Cable

FEATURES

- USB 3.0 Uses Tinned Copper Stranded 28 AWG Cables.
- USB 3.0 Cables Contain Twice As Many Wires As USB 2.x To Support SuperSpeed Data Transmission & Are Thus Larger In Diameter.
- Power Up To 3.6 W May Be Used.
- Full-Duplex Communications.
- USB 3.0 Standard Does Not Directly Specify A Maximum Cable Length - Requires only that all cables meet an electrical specification for copper cabling with AWG 26 wires.
- Available in Lengths - 3, 6, 10 & 15ft.
